Preliminary Amendment

Sir:

Prior to the examination of this application, and the determination of fees, please amend the application as follows.

Please cancel claims 1-16.

Please add the following claims.

17. A home or office security system comprising:

a network via which a plurality of appliances communicate to effect a control of one or more appliances of the plurality of appliances,

a first appliance of the plurality of appliances having:

a first appliance component that is configured to effect a primary function of the first appliance that is independent of security, and

a status reporter that is configured to communicate a status of the first appliance via the network;

an alarm activation processor, operably coupled to the status reporter, that is configured to receive the status, and to effect an alarm response dependent on the status.
